K9 Omega is the top quality fish oil supplement for dogs available today. A blend of Omega 3, 6 and 9 fatty acids properly balanced for canine needs, **K9 Omega** helps support optimum cellular repair during cancer treatment. This supplement was formulated from all coldwater fish sources, using oil from salmon, anchovy, herring, sprat and sardines, with natural vitamin E to enhance freshness. Unlike most human grade products, there are no flavors or fillers added, so feeding is easy. (Stinky, fishy smell - dogs LOVE it!) These softgels can be fed as treats once the dog knows what they contain, or the capsules can be opened and the oil squeezed out on the dog's food. **Dosage is 1 softgel per 20 lbs body weight per day. Why use a human product when this is formulated specially for dogs?** Bottle contains 60 softgels 1000 mg each of fish oil concentrates.

"Help Your Dog Fight Cancer" is the Best Book Available on what you can do to help your dog through the fight of his or her life. This book goes into great detail about all the options, and the decisions you need to make. What kind of diet to feed, what chemotherapy options, etc. We HIGHLY recommend this book to anyone with a sick dog. Please read this, it's VERY important!

Preventing and Treating cancer in Dogs by Shawn Messonnier DVM

The latest book covering all the technical aspects of treating dogs with cancer, the various drugs and protocols used and what side effects to expect with these therapies. Also a comprehensive section on supplements that can be advantages in dog cancer cases. This book is much more technical than Help Your Dog Fight Cancer and is more aimed at the professional, but is good reading for anyone who wants all the details available. We recommend both books to get the clearest picture of all your options is helping you dog overcome this challenge of his or her life.
