

Medicinal Mushrooms Extracts - Full Spectrum - Patented

We are often asked 'How Are Medicinal Mushroom Grown?' This is a highly specialized branch of the biotechnology industry called Sterile Tissue Culture. Aloha Medicinals is the worlds leader in this field, and the Largest Producer of Medicinal Mushrooms in the World Today. Top quality products all starts with Lab growing of the raw materials, This is how we do it:

1. Genetically pure cultures

2. Transferring culture to inoculum

3. Substrate cooling in sterile air

4. Inoculating the substrate

5. All work done in sterile air environment

6. Hermetically sealed growing bags

7. Growing in Sterile Environment

8. Ready to Harvest

9. Quality Control

Ganoderma - Reishi - Ploverotus - Oyster - Cordyceps - Hericium - Lions Mane
Over 100 species of medicinal mushrooms available.
